Dear Human Resources Department Institut Pasteur de Tunis

Subject: Application for an Internship in Immunology Research

Dear madam

I wish to state my intention to perform an internship at the Institut Pasteur de Tunis. With my training on the border of Tunisia in immunology, I would be able to serve my purpose to be of value to an institution whose research facilities are a landmark of research in Tunisia and the surrounding regions.

During my scholarly training, I came to acquire proficiency in cell and molecular biology, various immunological and mechanistic approaches, and research methodologies. Driven by my coursework and research, I reached a clear understanding of the different immune response pathways, analysis of research frameworks, and the inscribed practical public health focus of applied research.

Joining your laboratory would be an invaluable opportunity to expand my research experience within a highly stimulating scientific community. I am particularly eager to work alongside your team to deepen my practical knowledge of immunological methods, data interpretation, and advanced biomedical technologies. Beyond the technical learning, I aspire to contribute actively to ongoing projects and uphold the rigorous scientific standards that characterize the Institut Pasteur.

I am confident that my academic background, research curiosity, and strong work ethic would allow me to integrate smoothly into your team and add value to your projects. I would be honored to discuss how my skills and motivation align with your current research directions.

I would welcome the opportunity to further discuss how my skills and background align with your research objectives. I am available for an interview at your earliest convenience

Yours sincerely,
